

Swayam Vishwakarma

Bangalore — swayamv259@gmail.com — +91-9508383139 — Portfolio — LinkedIn — GitHub

Professional Summary

Full Stack Developer with hands-on experience building scalable web applications and AI-driven solutions. Skilled in developing responsive user interfaces, integrating REST APIs, and creating automation workflows using Python and LangChain. Currently interning across Web Development and Generative AI domains. Proven ability to deliver real-world projects with measurable impact and optimized performance.

Education

JSS Academy of Technical Education, Bangalore	<i>B.E. in Computer Science</i>	<i>2022 – 2026</i>
St Mary's English High School, Jharkhand	<i>Senior Secondary Education</i>	<i>2020 – 2022</i>

Technical Skills

Programming Languages: C, C++, Python, JavaScript, SQL

Frontend Technologies: HTML5, CSS3, React, Tailwind CSS, Bootstrap, Responsive UI Design

Backend & Database: Django, Node.js, Express.js, REST API Integration, Firebase (Firestore), SQL, MongoDB, Redis

DevOps & Infrastructure: Docker, CI/CD Pipelines, Load Balancing, Horizontal Scaling, Nginx

Tools & Platforms: Git, GitHub, Vercel, Render, Firebase, Visual Studio Code

Relevant Coursework: Problem Solving, Operating System, Networking, OOPS, Generative AI, OpenAI

Experience

AI Full Stack Engineer – <i>Learner's Byte Global InfoVision</i>	<i>Feb 2026 – Present</i>
---	---------------------------

- Designed and developed AI-powered full stack applications including summarizers and productivity tools, significantly reducing manual effort across workflows.
- Built LangChain-based AI agents with multi-step pipeline orchestration, integrating frontend interfaces with backend logic for real-time task execution.
- Integrated third-party APIs (OpenAI, Gemini) with scalable backend services and responsive frontend UIs to deliver intelligent, dynamic user experiences.

Web Development Intern – *The Developers Arena*

Oct 2025 – Jan 2026

- Building responsive web interfaces using React.js, Node.js, HTML5, CSS3 and JavaScript for real-world client projects.
- Reduced bug count through systematic debugging and code reviews in collaboration with senior developers.
- Collaborating in an agile team using Git/GitHub for version control across multiple feature branches.
- Contributed to a live production codebase within the first week of joining the internship.

Projects

AI Voice Assistant – <i>Python</i>	<i>GitHub</i>
---	---------------

- Built a voice-controlled assistant supporting **20+** commands (web search, app launch, system control) with **~90%** recognition accuracy.
- Integrated Gemini API for NLP-driven responses, reducing manual task execution time by **40%** across **5+** daily use cases.
- Tech:** Python, SpeechRecognition, JavaScript, Gemini API, OS, Webbrowser

Diagnostic Appointment Booking – *Full Stack (MERN)*

Live

- Built a full-stack MERN application with React frontend, Node.js/Express backend, and MongoDB handling **50+** daily interactions. Integrated a payment gateway enabling secure online transactions, reducing booking drop-off by **35%** in simulated testing.
- Implemented full CRUD for appointment management with real-time Firebase sync; improved navigation UX reducing friction by **20%**.
- Tech:** React, Node.js, Express, MongoDB, Redis, Docker, Firebase, Tailwind CSS, Vercel, Git

Edukart – *Django Web App*

Live

- Developed a full-stack platform supporting **100+** users with **5+** features: authentication, study rooms, discussions, and filtering.
- Boosted user engagement by **30%** via UI/UX redesign; optimised database queries reducing response time by **25%**.
- Tech:** Django, Python, HTML5, CSS3, JavaScript, Bootstrap, SQLite, Render

Certifications

Gen AI Powered Data Analytics – <i>Tata Forage</i>	<i>Sep 2025</i>
---	-----------------

- Completed a job simulation in AI-powered data analytics; performed EDA using GenAI tools and developed strategic business recommendations.
